

# FACILITIES WORKDAY ~ APRIL 10

We have a couple of projects on the Shadow Rock campus that need some volunteer help.

As usual, we have tree trimming and weeding to be done. There are a few tree branches that need cutting and hauling away for pickup.

The other large project we are working on is refinishing the bridge. We need volunteers to help prepare the bridge for protective coating application. We will be sanding the hand railings and posts. We have several sanders, but volunteers are encouraged to bring their own. We have plenty of appropriate sandpaper sheets that can be cut to fit most sheet sanders. Power is available at the bridge for corded sanders.

Hot weather is expected! Please be prepared. We plan to stop around 11:00, but it will still be warm. We will have water available. Volunteers should be prepared for staying safe while working in the sun:

- Sunscreen
- Hat
- Sunglasses
- Water bottle
- Gloves
- Long sleeves

Please call Roy with questions at 602-689-3950.
