

Ontario Sailing Training Centres

Ontario Sailing's vision for our Training Centres is to offer ongoing support to coaches to ensure the continued growth and development of club sailing programs across the province.

Our Training Centres will provide more aligned and centralized training environments in which to provide ongoing mentorship and professional development for club coaches. Ontario Sailing is committed to ensuring there are best practices for all areas of coaching available with specialized resources to better develop coaches and athletes.

There are three levels of Training Centre recognition and support available to suit the needs of a variety of clubs, coaches and athletes. Please carefully review the options available and select the level appropriate to your club to best suit the needs of your coaches/instructors.
