VIRGINIA WESTERN

Do your employees need to improve their IT or computer skills? Virginia Western can help! With fast-paced concentrated short programs offered online or in a classroom setting, the coursework can be completed in just a few months

Students can take cutting edge courses in Networks, Security, Python, Java, Cisco, Cloud, Database, Web technologies, and more. And they can quickly earn industry certifications from CompTIA, Cisco, Microsoft, Oracle and others. A newly opened state-of-the-art cybersecurity lab provides hands-on experience for collaborative work on Cisco equipment, IoT devices, and more.

Virginia Western meets company technology retraining and job pivoting needs that are invaluable and affordable. Dedicated adjunct faculty working fulltime in valley industries complement full-time faculty and offer insight regarding technology needs. Many graduates have become valued employees to local industry partners.

For 50 years, Virginia Western has been an integral part of technology training in the Roanoke Valley. We pride ourselves in computer science and information technology credit courses for those new to the field and those looking to upgrade skills and earn industry certifications.
