OCEANOGRAPHIC
INSTITUTION

CROSSING THE GULF STREAM

YOU ARE INVITED

The Woods Hole Oceanographic Institution (WHOI) and the Cruising Club of America Boston Station cordially invite you to an evening of virtual cocktails and conversation featuring **Dr. Magdalena Andres** and **Dr. Glen Gawarkiewicz**, two WHOI scientists whose research focuses on the Gulf Stream and its effects on our local New England waters.

The Gulf Stream is an ever-changing and highly dynamic boundary current that so many mariners think they know. Recent research suggests that it is even more dynamic than anyone previously thought.

Glen and Magdalena will provide an overview of their instrument-intensive work including exciting new findings about “The Stream” and its effects on our lives here in New England.

Tuesday, November 17th
7:00-8:00 PM

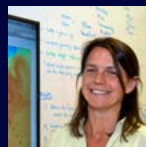

REGISTRATION REQUIRED

go.whoi.edu/CCA

For additional information or registration assistance, please contact Andrew Rose at WHOI, 781-771-6891 or andrewrose@whoi.edu

Dr. Glen Gawarkiewicz
Senior Scientist
Physical Oceanography

Dr. Magdalena Andres
Associate Scientist
Physical Oceanography
