

# WANTED:

## Ash trees infested with Emerald Ash Borer

The University of Maryland is looking for trees infested with Emerald Ash Borer between the dates of **November 1<sup>st</sup> to April 15<sup>th</sup>** to use in a joint study with the MDA and USDA. The beetles will be reared and collected in our rearing facility in College Park.

*The trees must be alive, not treated with any insecticides, and display most, if not all, signs listed above. Logs must be cut into 2' sections, and be between 2" to 12" in diameter.*
