In 2-Year Period

GOING NUTS IN ALABAMA

In March, Maxis completed a project with a New Mexico-based client who grows and processes pecans. The company will build a new processing facility, and engaged Maxis to assist with site selection and incentives negotiations. After a comprehensive analysis, Dothan, Alabama was selected as the winning location. Maxis worked with state and city officials to secure tax credits and abatements, workforce development services, and local discretionary support.
