rachaelthewino Did you know: Cariñena is the only region in the world that gives its name to a grape variety, the Cariñena grape, because of its origin. The same name Cariñena was also used to distinguish the Wine Appellation, created in 1932, among the oldest officially recognized regions in Spain!

Thanks to @gregoryandvine for this wonderful example of Cariñena from @grandesvinos\_ca ! I am seriously OBSESSED!! This wine is super jammy and would pair perfectly with some many Thanksgiving dishes! .

chicago.wine.dude I say Garnacha

odedis.wine.reviews I love Grenache

dallaswinechick @chicago.wine.dude I will say either if I can drink them

foodwineclick Perfect grilling weather! Just wipe the snow off the table & shovel the deck. Enjoying a wine from Carinena Spain as our chuck roast slowly smokes. Otto of the north is protecting the precious cargo from rabbits!

Rostov am Don

marinkamurka «Декантация насыщает вино кислородом. Процесс довольно простой: резкие ароматические соединения окисляются, запах становится приятнее, снижается концентрация некоторых кислот и таннинов. Это делает вино более мягким. Одним словом – волшебство!»
