

Online Tools for Bridge

Do you want to improve your bridge game? Are you interested in earning ACBL masterpoints or enjoying a casual bridge game by playing online by yourself, with your partner, or with bridge players around the world? Do you wonder why the printed hand record says you can make 6NT when you clearly have two losers?

You can use your computer and/or smartphone in many ways to help you learn, play, improve and build your enjoyment of the game.

This educational session will be interactive and, time permitting, we'll address:

- ~ An introduction to online bridge games such as BridgeBase and FunBridge
- ~ Overview and key features of the CBC website
- ~ Overview of Bridge Solver, a hand evaluation and play tool.
- ~ Other online resources for bridge players

Two sessions are scheduled and will cover the same material:

Monday February 17 9:00 AM

Wednesday February 19 10:00 AM

There is no charge for these sessions taught by Glenn Mitchell.

If you are planning to play in the game that day....
remember to bring a lunch.
