

# The Sanctuary

The lighting project is important to us because the sanctuary is the center of our life together. It's where we worship, share the sacrament, celebrate baptisms, exchange wedding vows, remember beloved ones in memorial services and confess our faith in Christ.

# The Campaign

This is a two-year capital campaign. Some will want to make a one-time gift, others will sign up for monthly gifts of \$200, \$100, \$50, or \$25/month—whatever works for you. The website is set up to allow contributions to the Lighting Campaign distinct from your regular giving. Just click on Give at [oslc-everett.com](http://oslc-everett.com).

## Efficient Lighting

The new system will replace a failing and unrepairable one with warm spectrum LED lights, new controls, and balanced and bright lighting for every pew. It will significantly lower our costs and energy use. In fact, the new system will provide twice the light at half the wattage!

- The lack of available existing lamps and parts could leave the sanctuary dark for an extended period of time.
- Brighter, uniform light creates a better atmosphere. Eliminating incandescent lamps also reduces glare.
- A new lighting control system gives us the flexibility to program individual light fixtures to any lighting scheme .
- The aesthetics and lighting control function are updated to today's standards.
- Operating costs are significantly lower.
