

# Persistence Leads to Dream Position

John Misiuk, a job seeker who visited our Milford Career Center and was selected for the Reemployment Services and Eligibility Assessment program (RESEA) attended the Career Center Seminar on August 26<sup>th</sup> of 2015 and completed his RESEA Review with his Career Counselor a few days later. John worked with a Veteran Representative as other Career Counselors on 5 different occasions for one-on-one sessions regarding his interview skills, networking opportunities, and resume preparation as well as work on his job search activities.

John participated in several Job Fairs as well as outside Networking Events. During the course of John's long-term unemployment he consistently kept in contact via email and telephone with his Career Counselors. His Counselors states, "John was incredibly diligent but was unable to find a job." After a year, John's persistence and his use of the Career Center paid off as John received a position at the Waters Corporation in Milford as a Senior Training and Development Specialist. According to John "My new position at the Waters Corporation is 8 minutes from my house and they met my salary demands." John expressed his thanks and gratitude toward the Milford Career Center staff for their support and help during his job search.
