Did You Know?

Weather forecasts show above-normal temperatures & National Grid rates triple through Fall.

What Can You Do...

- *Adjust AC Settings: For every degree higher, the unit uses 1-3% less energy*
- *Keep Windows Covered: Reduces heat gain by up to 45%*
- *Energy-Efficient Windows: Low-E can reduce energy loss up to 35%*
- *Rotate Ceiling Fans Counterclockwise: Creates a windchill effect*
- *Proper Roof Ventilation: Crucial for balancing attic temperature and reducing mold/mildew*
- *Insulate with Foam-Backed Siding: 25% of your home's energy is lost through exterior walls*
