

On behalf of Mayor Carolyn McAdams and the Greenwood Leflore Recycling Center, we would like to thank all the citizens of Greenwood and the surrounding areas for recycling. With that said, the 2022/2023 fiscal year (October 2022 thru September 2023) has come to an end for the Greenwood Leflore Recycling Center and with the help of the greenwood community and the surrounding areas, we did a good job preventing material from going to the land field and preserving the earth. The numbers below will show how important it is to recycle and the support that the citizens of greenwood and the surrounding areas have in this program, and we encourage more citizens to participate in the recycling program so we can increase these numbers in the 2023/2024 fiscal year, and it starts with you:

- We prevented 403 tons of recyclable material from going to the landfill.
- We produced 705 bales of different material from October 1st, 2022, thru September 31st, 2023.
- We shipped 659 bales of different commodities ranging from cardboard, mixed paper, and plastic.
- This equals 744,823 IBS of recyclable material that will be used to produce different items.

If anyone has any questions or would like to tour the recycling center, please give me a call,

Darwin Greene - Recycling Coordinator
