Security Health Plan's Medicare Advantage HMO-POS plans earn 4 stars from the Centers for Medicare and Medicaid Services

The Centers for Medicare and Medicaid Services (CMS) released its 2025 ratings recently and Security Health Plan earned 4 stars for our Medicare Advantage HMO-POS plans. The rating reflects a collaborative effort between Security Health Plan and our network provider partner groups to bring our members high-quality primary and specialized care.

"This 4-star rating highlights the dedication and hard work our valued provider partners do to ensure our members receive exceptional care and support. This rating shows we are a high-performing health plan that offers members programs and services to assist with a variety of needs. Whether it is preventive care, medication adherence or solutions to get prescription medications, we are focused on helping members," said Security Health Plan Chief Executive Officer Krista Hoglund.

Security Health Plan continues to implement new programs and services to provide members with increased education about preventive screenings, cost-saving prescription medication alternatives, care management and medication adherence programs. This year we increased our scores in 11 out of 40 HEDIS thanks to a combined effort from providers delivering high-quality care to our members. We continue to support our members in their overall health and offer education and services such as health coaching, fitness resources, smoking cessation support, over-the-counter credit to purchase items, and other perks.

"We continue to place our members' health and well-being at the top of our priority list. We want our members to be informed and educated about preventive screenings, support services and programs to keep them healthy now and in the future. We have a huge amount of respect and gratitude for our network providers who serve our members with the highest level of medical care," said Chief Medical Officer Renee Smith, M.D.

Security Health Plan continues to implement new measures to collaborate with our provider network partners in a variety of ways. From education about star ratings to new chronic care management services and programs available to our members, we remain focused on strengthening our partnerships to keep our members healthy.
