Provider portal features easier way to find members' Coordination of Benefit details

The Security Health Plan provider portal now provides an easy way to look up Coordination of Benefits details. The provider portal will now display the name of the other insurance Security Health Plan believes is primary for our members. You will also be able to view the primary plans identification number, the eligibility date range for the primary coverage, the group number and group name.

While Security Health Plan cannot guarantee this information is always accurate, complete or up to date, this increased level of detail will allow providers to self-serve and improve efficiencies.
