

Security Health Plan outlines language resources requirements

In accordance with the nondiscrimination provision of the Affordable Care Act (ACA) Section 1557, Security Health Plan is committed to providing easily accessible online tools and resources to support our network providers' efforts to provide clear communication to all patients.

For Security Health Plan providers with patients that require language assistance, the telephone language line is provided free of charge. This line is intended for our contracted providers who do not have access to interpretation services and need to interact with Security Health Plan patients who do not speak English or have limited English language proficiency.

For more information, please refer to the following resource in Security Health Plan's Provider Manual. [Click here](#)
