

Reminder: Changes coming to genetic testing, skin substitute prior authorization processes

Security Health Plan is implementing a series of targeted prior authorization (PA) adjustments designed to streamline processes, support vendor alignment and ensure appropriate oversight where needed. Key changes include vendor standardization and selective PA additions or removals across specific service categories.

New lists with code level details [are available on the website](#) and provider portal. As a reminder these updates are upcoming in March and April:

- **Genetic and Molecular Testing**
 - Medicare Advantage: Effective **March 1, 2026**, prior authorization will be newly required for genetic and molecular testing.
- **Skin Substitute**
 - Prior authorization will be required for skin substitutes **effective April 1, 2026**.

Please reach out to provider experience team at (800) 548-1224 with any questions.
