

Wisconsin Medicaid Services publishes revised sterilization form

The Wisconsin Division of Medicaid Services published a revised Consent for Sterilization form and changed the form title from F-01164 to DMS-1000.

Providers can find the [Consent for Sterilization](#) form in both English and Spanish on the Wisconsin Department of Health Services forms library page.

Security Health Plan Medicaid HMO will require all providers to use the revised DMS-1000 form for all sterilization procedures. Providers should remove and discontinue use of any previous versions of the form. Failure to submit the revised form will result in claim denials for invalid sterilization consent form.
