Receive your hospital access payment electronically and eliminate the wait for a paper check

Security Health Plan continues to make progress on switching providers from paper checks to electronic payments for hospital access payments. There are several providers that have not sent back paperwork to authorize this switch. Security Health Plan encourages electronic payments (or ACH payments) as they are more secure and cost-effective. If you are receiving a paper check, please review the information inserted with the check that outlines instructions on how to make the switch.

You can also send an email to staver.jannel@securityhealth.org to receive the required forms by email. Please write “Forms for Electronic Payments” in the subject line to request the necessary forms.
