

Security Health Plan's CMS rating increases to 4.5 stars, recognized among top health plans in Wisconsin and nationwide

Security Health Plan has earned an improved overall rating of **4.5 out of 5 stars** from the Centers for Medicare and Medicaid Services (CMS) for its 2026 Medicare Advantage HMO-POS plans, up from a 4-star rating last year.

CMS evaluates health plans based on a 5-star rating system, assessing factors such as member experience, access to care and clinical quality. CMS implemented the star rating system in 2007 to help Medicare consumers evaluate health insurance companies. CMS adjusted the thresholds higher for several performance measures, raising the bar for plans to attain or maintain a high star rating. This increase reflects Security Health Plan's continued commitment to enhancing member care, expanding access to preventive services and improving affordability of prescription drugs.

"We are proud to see our CMS rating increase from 4 to 4.5 stars," Sanford Health Plan President and CEO Tommy Ibrahim said. "This achievement is a testament to our ongoing efforts to provide compassionate, high-quality care and service to our members. We remain focused on strengthening our provider partnerships and improving the value of our insurance plans for every stage of life."

Security Health Plan has implemented programs and services to support member health, including at-home colorectal cancer screenings, health coaching, fitness resources and services for members to save on prescription costs. These initiatives have contributed to improved outcomes and member satisfaction.

"We are always striving to exceed industry standards and member expectations," Ibrahim added. "This rating increase shows our dedication to helping members follow preventive screening recommendations and treatment protocols."
