Security Health Plan policy review – policies effective May 2023

Security Health Plan reviews medical policies on a monthly basis. You can find our medical policies in the provider section of the Plan's public website. We invite providers with specific professional knowledge or clinical expertise on certain subjects to provide input and opinions on our policies as we review and develop clinical criteria regularly.

Click on Security Health Plan's policies web page, www.securityhealth.org/providers/medical-policies, for more information including past monthly policy reviews.
