

Camp Conservation For Teachers: A Virtual Workshop Series

Urban Environmental Science Education Program (UESEP) & Project Learning Tree (PLT)

Join Alabama Extension and Project Learning Tree (PLT) to learn new techniques for integrating Environmental Education into Science, Technology, Engineering and Mathematics (E-STEM) learning in your K-8 classrooms. Each session will include lessons from the award-winning PLT environmental education curriculum as well as offerings from Alabama Extension that will engage and excite your students. PLT curriculum e-books are available as a free download when you register. Register by July 7th for a chance to receive an Environmental Educators E-STEM Field Pack. This professional development course offers six continuing education units (CEUs) through AMSTI.

Let's make learning fun by exploring the natural environment!

Register at: www.aces.edu/go/CampConservation

E-STEM Topics

July 14th: *Forestry: Trees & Forest Ecosystems*
