

2025 Workplace Safety Index: Leisure and Hospitality

Annual report from Risk Control Services

The U.S. Leisure and Hospitality industry loses more than \$3.55 billion a year to serious, nonfatal workplace injuries.

Ask yourself

Are daily site assessments conducted to address uncontrolled slip, trip, and fall hazards?

Are the appropriate tools available to handle equipment and complete repetitive tasks?

Do you have accountability for flooring safety when weather conditions change during the day?

Direct costs for the Leisure and Hospitality industry:

Total for non-fatal, work-related injuries and illnesses with more than five days away from work.

The top five causes

		Cost in billions	Percent of total
1	 Falls on same level	\$1.11	31.1%
2	 Overexertion involving outside sources (handling object)	\$0.59	16.6%
3	 Struck by object or equipment (being hit by objects)	\$0.41	11.6%
4	 Slip or trip without fall	\$0.18	4.93%
5	 Other exertions or bodily reactions (awkward postures)	\$0.18	4.92%

Are these injuries just the cost of doing business?

Risk is often a part of doing business, but understanding the risk and having controls in place can help protect your workers and your bottom line. Have you done all you can to help mitigate the risk of these injuries?

The experienced specialists of Risk Control Services understand the complexity of the Leisure and Hospitality industry – and the risks involved.

Scientific methodology: The Liberty Mutual Workplace Safety Index is based on information from Liberty Mutual, customized data from the U.S. Bureau of Labor Statistics (BLS) Office of Safety, Health, and Working Conditions, and the National Academy of Social Insurance (NASI). BLS non-fatal injury data are analyzed with the Liberty Mutual data to determine which events caused employees to miss more than five days of work, and then to rank those events by workers compensation costs, which are then scaled to the NASI total cost. To capture accurate injury cost data, each index is based on data three years prior. Accordingly, the 2025 index reflects 2022 data.

The illustrations, instructions, and principles contained in the material are general in scope and, to the best of our knowledge, current at the time of publication.
