Local HOPE Convening

WHEN: OCTOBER 9, 2024

Stoughton YMCA
445 Central St Stoughton, MA

We are hosting a HOPE Convening to talk with representatives from child and family serving organizations throughout the state of Massachusetts about the HOPE (Healthy Outcomes from Positive Experiences) Framework. We will start with a brief introduction to the framework for those who are newer to HOPE. We will then review the various ways that organizations can help bring more equitable access to Positive Childhood Experiences into their communities from utilizing free online asynchronous resources to staff training and organizational certification. There will be time for formal didactic information sharing, informal conversations over a meal or snacks, and question and answers with members of the HOPE National Resource Center and local HOPE Champions.

Network with representatives from a variety or organizations in the state of Massachusetts interested in implementing the HOPE framework.

HOPE National Resource Center Staff: Robert Sege, MD, PhD and Dina Burstein, MD, MPH

Come join us to learn more about how your organization can implement the HOPE (Healthy Outcomes from Positive Experiences) Framework and become HOPE-informed. We know that key types of Positive Childhood Experiences (PCEs) are crucial for the health and wellbeing of all children. It takes a village to get these PCEs into the hands of families, and every child-serving agency has a role to play in creating healthier communities. Hear from leaders at the HOPE National Resource Center and local Massachusetts HOPE experts how your organization can formalize policies, procedures, and staff training to be part of the solution.

Draft Agenda:

10:00-12:00: Intro to HOPE and HOPE Certification Process

12:00-1:00: Lunch and Networking

1:00-2:00: Q&A with HOPE Staff and HOPE Champions & Next steps
