Child Sexual Abuse is a Public Health Epidemic
1 in 4 women and 1 in 6 men report having experienced childhood sexual abuse. It is time to talk about it!

The Enough Abuse Campaign is a comprehensive state and community mobilization initiative working to build a movement of concerned citizens educated about child sexual abuse and engaged in direct actions to prevent it. The Campaign's mission is to prevent adults from sexually abusing children today, and to promote the healthy development of children and youth, to reduce sexually abusive behaviors from occurring in the future.
