

## REACH Mobile Unit

The goal of this mobile unit is to provide person centered supportive services to those in need. Supports include access to showers (closed mid-November to April due to winter weather) basic food items, and support with navigating resources on/off Cape.

Individuals are also able to access substance use disorder services and harm reduction resources (naloxone and fentanyl test strips) from the unit. The mobile unit is outfitted to be able to support telehealth access to medications for opioid use disorder treatment with providers.

Although individuals will have the ability to be linked to medical and behavioral health services from the mobile unit, those services are not provided on the unit.
