Open Burning, Odors, Dust, and Asbestos During Demolition

March 11, 2021 at 2:00 p.m. EST

John Paulian

The most frequently reported complaints to Ohio EPA's Division of Air Pollution Control are for open burning, odor, and dust. Ohio EPA also receives numerous questions about the regulation and management of asbestos during demolition. There are state regulations dealing with open burning, dust, and nuisance odors, but what should you do if you or your community is having issues with these? How should your community deal with various asbestos issues that may arise when demolition occurs, including during emergency demolitions?

Join us on March 11 to hear advice from experts on how to deal with these frequent, and often contentious, community issues.

Jeff Gerdes

Ohio EPA's Division of Environmental and Financial Assistance is hosting a series of In Your Community webinars in 2021. Each webinar will focus on environmental issues that have an impact at the local level - from how Ohio EPA regulates sources of air pollution, waste management, wastewater and storm water discharges to ways your community can promote environmental stewardship and improve the environment.
