

Ohio EPA's Water Supply Revolving Loan Account Program Year 2022 Updates and Highlights Webinar

January 21, 2021 at 10:00 a.m. EST

U.S. EPA's 6th Drinking Water Infrastructure Needs Survey and Assessment, published in 2018, reported that \$472.6 billion is needed to maintain and improve the nation's drinking water infrastructure over the next 20 years. Ohio's portion of that total is \$13.5 billion.

Ohio EPA's WSRLA program provides financial assistance for the planning, design, and construction of improvements to community water systems and non-profit non-community public water systems. Since its inception, the WSRLA has provided more than \$1.8 billion for water infrastructure improvements, and the demand for funding continues to increase every year.

In preparation for the WSRLA program's annual call for project nominations, we will be hosting a webinar on January 21. Join us to find out what's new and get important updates and highlights for program year 2022.

The WSRLA program is jointly managed by DEFA and the Division of Drinking and Ground Waters (DDAGW). WSRLA funds are available to eligible applicants that submit a complete nomination package for each project during the nomination period.

Presenters: Jon Bernstein, DEFA Assistant Chief; Katie Courtright, DEFA Loans and Grants Manager; Tanushree Courlas, DDAGW Environmental Supervisor.
