

NWEA MAP Fall Update

District 28 Board of Education Report
November 24, 2020

District-selected assessment: NWEA MAP

MAP is a standardized test. In District 28, we use it alongside local measures such as classroom tests and other assessment data collected by teachers.

MAP is a normed test, meaning it compares the performance of students to a normed group.

We administer NWEA MAP to 2nd through 8th students in math and reading in fall, winter, and spring.

What is NWEA MAP (Measures of Academic Progress)?

- A computer adaptive assessment
 - This means that each student responds to a unique set of questions, based on their responses during the assessment
- Measures growth over time and is not grade level dependent
- Questions align to Common Core State Standards

MAP Administration this Fall

Testing Window: September 21 - October 23

In-person students took MAP onsite; RLA students took MAP remotely

How is NWEA MAP used?

MAP is one data point to be used in conjunction with other assessment information to understand a child's learning needs.

MAP helps school and district leaders identify strengths and areas for improvement for curriculum and school programs.

MAP helps teachers understand what students know and are ready to learn next.

MAP is sometimes a part of a course placement process.
