

I'm **Larry Organek** and I'm running to be on the **Board of Trustees** for **Boyne Falls**.

My family hails from Boyne Valley Twp and has lived in the area since about 1900. So, I'm a little familiar with the area.

I am a retired engineer. I am a resident and have been involved in **Boyne Falls** for a little over three years. Although I am not a Trustee, I am a founding member of **Boyne Falls Planning Committee** that looks to the future of Boyne Falls and sees Boyne Falls as a Diamond in the Rough. I also started a private Boyne Falls FaceBook site called **Friends of Boyne Falls Future** 3 years ago and presently have about 175 guests where it is open to Residents to voice their opinions or suggestions in a respectful way.

We have many problems that have gone unaddressed for years because of "lack of money". Because we are a small Village of 350 residents with 125 homes it becomes very expensive to fix stuff when it breaks. We have to rely on others for help with the Big Problems. I am not above asking for help from the Federal, State and Local government units and I know how. Working with the Planning Committee and Conservation Resource Alliance we have secured over \$300,000 in grants to do a Feasibility Study for the River/Pond/Dam issue. I don't shy away from Hot Button Issues.

My agenda for Boyne Falls:

- Put the **FALLS** back in Boyne Fall.
- Fix Center Street,
- Get a traffic light at 131 and M75,
- Reduce the speed limit on C48 from 55 mph to 35mph.
- Get a crosswalk at C48 to get to the Dollar General.
- Improve sidewalks on Railroad and Center Streets.
- Get the salt shed built.
- Allow a pot store into the Village to generate about \$60K in new tax revenue per year.

There is no Best Person for the job of Trustee. It takes a Team. There are 9 residents running for 6 positions this time and it only takes 4 to Stop or Start Boyne Falls Future. That's why its important to pick the right 6 to make the Right Team. If you like my Agenda, then you need to select me and the Team that will deliver.
