Blast Energy Increases Alertness!

Ramp up those energy levels for an early morning kick-start, a late afternoon pick-me-up or to keep you going through the night. Blast Energy provides that ultimate hit when you need it most.

The science behind this great tasting formula is the Niacin, Pantothenic Acid, Vitamins B6 & B12. They are the ultimate combination of ingredients reducing tiredness and fatigue, while the injection of caffeine and taurine will increase your energy and keep you focused and alert.

We have one simple mission:

To offer consumers all the energy of the leading brands, with market leading taste, all at a great price.

Introduced as Boost in the UK in 2001, with over 100 million units sold it's now **the #1 selling energy drink in England, Ireland and Scotland.**

Compares to Red Bull in flavor and effect at a fraction of the price.

Blast Energy is a high quality beverage at a great price that's now being introduced to the U.S. market for national distribution.

Price marked cans ensure consumers see the value.
