

FALL LAWN CARE TIPS

Overseeding is a great way to get your lawn in top shape. Overseeding is spreading grass seed over the fresh lawn to maintain a green appearance.

1

Rake Your Lawn

2

*Pull Weeds and
Other Debris*

3

*Overseed Your
Lawn*

Prepping your lawn for the winter months in the fall is a huge step towards having a great looking lawn in the spring time. Here are a few tips and things you should do to prep your lawn for winter.

The most important thing to do when caring for your lawn in the autumn months is to rake and dispose of the leaves. By doing this, moisture evenly distributes across your lawn.
