

CRISP

Changes to the Post-Acute Capacity Report

-Effective Tuesday, November 17, 2020

7160 Columbia Gateway Drive, Suite 100
Columbia, MD 21046
877.952.7477 | info@crisphealth.org
www.crisphealth.org

Overview of Changes-Page 1 of 3

- How long do you anticipate that PPE you have on hand will last? Refer to the CDC's PPE burn Rate Calculator **in contingency capacity**. There is a link embedded.
- Added options to the PPE section: 0 days, 1-6, 7-14, **15-30, 31-45, 45-60, 61 or more days**
- Added a question in the Resident section after the transfer questions: **"Of the residents transferred to the hospital for COVID-19, how many died (in the hospital) in the last 24 hours?"**

Overview of Changes-Page 2 of 3

- Modified the existing Resident question on Hospitalizations:
 - COVID +
 - Non COVID
 - Severe Respiratory Symptoms (Deleted “COVID Suspected”)
- In Staff section, modified the existing hospitalization question to parallel the Resident section. Number of staff transferred to a hospital in the past 24 hours:
 - COVID +
 - Non COVID
 - Severe Respiratory Symptoms
- In the Staff section, added a new question after the hospital transfers question:
 - Of the staff transferred to the hospital for COVID-19, how many died (in the hospital) in the last 24 hours?

Overview of Changes-Page 3 of 3

- Modified the existing death question “Number of **all** staff with suspected or laboratory positive COVID-19 resulting in death in the last 24 hours (**This should include both hospitalized and non hospitalized staff**).
- In Staff section, modified the existing hospitalization question to parallel the Resident section. Number of staff transferred to a hospital in the past 24 hours:
COVID +
Non COVID
Severe Respiratory Symptoms

How long do you anticipate that PPE you have on hand will last? Refer to the CDC's PPE burn Rate Calculator **in contingency capacity**. There is a link embedded.

Staff transferred to the hospital in the last 24 hours:	
COVID+	Of the staff members transferred to the hospital for COVID, how many died (in the hospital) in the last 24 hours?

Go to crisphealth.org/guidance/providers/ for additional information.

The screenshot shows a web browser window with the address bar displaying <https://crisphealth.org/guidance/providers/>. The website header features the CRISP logo on the left and a navigation menu with links: HOME, SERVICES, CONNECTED PROVIDERS, FOR PATIENTS, RESOURCES, POLICIES, and ABOUT. Below the header is a large orange banner with the text "COVID-19 Guidance for Providers". The main content area is titled "Overview" and contains the following text:

Under the new Statewide testing strategies and with the greater availability of tests, clinicians are no longer limited to testing symptomatic high risk patients. We encourage that you additionally test patients who are asymptomatic and may have directly or indirectly come into contact with a person known or suspected of carrying the COVID-19 virus. This strategy will help to identify additional asymptomatic carriers in order to contain the spread of the virus (see details below).

According to the Maryland Department of Health (MDH), healthcare providers shall prioritize COVID-19 test orders using the most expeditious means available (e.g., a hospital lab, commercial lab, or the State Laboratory) to the following groups:

The following populations should now be prioritized for testing:

- Any symptomatic individual
- Asymptomatic individuals where COVID-19 exposure may be possible, including:
 - contacts of confirmed COVID-19 cases
 - residents and staff of congregate living settings and long-term care facilities
 - healthcare workers and first responders
 - patients, especially high-risk unstable patients, whose care would be altered by a diagnosis of COVID-19
 - individuals employed in close contact settings
 - individuals previously in a large gathering
 - individuals directed to be tested by the Maryland Department of Health associated with a cluster, outbreak or contact investigation

In addition, retesting or serial testing of individuals should be conducted based on clinical or epidemiological indications or as directed by the Department or a local health department. To view the list of available test sites, click [here](#) or insert <https://coronavirus.maryland.gov/pages/symptoms-testing> into your browser.
