

## COVID-19 Vaccination Information – Assisted Living Facilities

Facilities need access to COVID-19 vaccination on an on-going basis, for new residents and staff and for those that previously declined but now wish to be vaccinated. Many retail pharmacies have expressed a willingness to work with assisted living facilities to make special arrangements to provide vaccine appointments.

If you have a regular pharmacy, contact them and ask if they are offering COVID-19 vaccine. If you do not have a pharmacy partner that is offering the vaccine, please contact a retail pharmacy near you and ask about receiving the vaccine for your residents.

If you need help identifying a pharmacy that has the vaccine near you, please go to this website: <https://coronavirus.maryland.gov/pages/vaccine>. Type in your zip code and you will see a map with the pharmacies that have vaccine. Choose a convenient pharmacy and follow the steps below.

**Step 1:** Contact the pharmacy and ask to speak with the managing pharmacist. Ask if the pharmacy currently offers COVID-19 vaccination and is willing to help.

1. If yes, proceed to step 2.
2. If no, then identify another nearby pharmacy that administers COVID-19 vaccination.
3. Once a pharmacy with COVID-19 vaccine willing to help is identified, proceed to Step 2.

**Step 2:** Share the information in the table shown below with the pharmacy, and talk with them about the following:

1. Estimated Need  
*What is the estimated need—how many new admissions and new staff does the facility have each month?*
2. Communication Plan  
*How will the facility communicate with the pharmacy when a vaccination is needed?*
3. Are residents able to travel to the pharmacy to receive a vaccination?
  - *If yes, how will the pharmacy coordinate appointments to accommodate special needs, e.g., wheelchair or walker accessibility, limited ability to stand or sit and wait?*
  - *If no, is a pharmacist able to travel to the facility to vaccinate immobile residents when necessary?*
