

# **#ProtectCropInsurance Social Media Toolkit 3.3**

#### **Contents:**

- This Week's Resources
- Social Media Posts

The Crop Insurance and Reinsurance Bureau (CIRB) and coalition partners collaborated to create a "Crop Insurance Myths vs Facts" resource guide that debunks common misconceptions about the crop insurance program. Using the resource guide as a foundation, CIRB shares a weekly social media messaging toolkit. We invite crop insurance coalition partners to use these templates as a starting point for your organization (and members) to share positive crop insurance messages on Twitter and Facebook.

If you have resources that you would like to see featured in future toolkits, please contact CIRB!

### **Coalition Update**

#### D.C. Update

President Trump has approved federal disaster declarations for <u>Nebraska</u> and <u>Iowa</u>. This week, the Senate could hold a vote on a \$14.2 billion disaster aid package that the House passed in January. Secretary Perdue <u>expects</u> flood relief to be included in the final bill.

Another legislative <u>option</u> Congress could consider is offering tax breaks for disaster victims which could include deductions for casualty losses, extending tax filing deadlines, easing limits on deductible contributions to charity or waiving penalties for tapping retirement accounts.

RMA Regional Director Collin Olsen <a href="mailto:encouraged">encouraged</a> farmers and ranchers to contact their crop insurance agent if they are concerned about prevented planting. "The agent can provide details on your prevented planting coverage and how and when to file a claim," he explained. To help farmers recover, USDA has set up a resource center at <a href="mailto:farmers.gov/recover">farmers.gov/recover</a>.

Our thoughts are with those across the Midwest who have been impacted by major **flooding** that has damaged billions of dollars worth of agriculture, businesses and infrastructure. If CIRB can be of assistance, please reach out to our staff. Please use this toolkit as an opportunity to emphasize the timeliness and certainty of the crop insurance program during natural disasters.

#### Sample Facebook Posts

Feel free to cut and paste or customize the below posts.

- #CropInsurance is a true insurance product proven to be efficient and effective
  when natural disasters strike. With the flooding in the Midwest, I understand how
  vital our crop insurance program is for our nation's farmers, ranchers and food
  supply.
- Farmers across the Midwest have been impacted by catastrophic flooding this week. This is why #CropInsurance is vital to the rural economy. When disaster strikes, this public-private partnership helps farmers recover from losses or, in this case, prevented planning. While ad hoc disaster assistance can take months or even years, private sector delivery allows farmers to receive their indemnity payment in less than 30 days. (Include below graphic.)
