What unique skills or expertise set you apart in your industry?

CC: Throughout my 30-year career, I've handled every conceivable family law matter. Today, my practice is focused on working closely with couples in the division of high-net-worth estates and pre- and post-marital agreements. I'm one of only a handful of Master Credentialed collaborative attorneys in Dallas specializing in Collaborative Divorce, a private alternative to traditional litigation.

LB: I utilize my background in big-firm commercial litigation to handle complex and high-stakes issues for my clients. My practice is primarily devoted to contentious divorce matters, including cases that involve complicated property divisions and sensitive custody disputes.

What aspect of your work fuels your passion daily?

CC: I'm proud to be a pioneer of the collaborative divorce process in Texas. With a focus on solutions and cooperation instead of conflict, I have seen collaborative divorce reduce stress and animosity for my clients. It is incredibly gratifying to guide couples through a process that preserves relationships, which is particularly vital for parents who need to cooperate in raising their children.

LB: Providing first-class representation and service to my clients is my priority and purpose, and there is no better reward than when intent aligns with positive outcomes for my clients. I take pride in helping my clients see that even amid some of the most difficult times in their lives, they can still gain control over their situation and turn it into something positive.

How do you define power in your field?

True power breeds innovation. We're proud to have developed Emotionally Intelligent Divorce® and Emotionally Intelligent Lawyering® services, honing the idea that the best client results are driven by lawyers who practice law with emotional intelligence.

Is there advice you impart to future power players?

LB: Take calculated risks. Don't be afraid to step out of your comfort zone. Sometimes, the most rewarding personal and professional growth comes from venturing into uncharted territory.
