

Cybersecurity Workshop For Manufacturers

Manufacturers in DOD supply chains are now required to be in compliance with the NIST 800-171 Cybersecurity Standard.

Did you know?

Manufacturing is the 3rd most frequently targeted industry for cyberattack.

1/3 of manufacturing companies are victims of a cyberattack.

Small Manufacturers are more likely to suffer a cyberattack than large manufacturers.

60% of all breaches include cyber espionage of critical IP and financial information.

Please join us for this eye-opening workshop presented to you by
AM&T in partnership with **The Advanced Institute for Manufacturing.**

Workshop Contents:

1. What is Cybersecurity
2. Insurance vs. Assurance
3. The Who, Why and What of Cyber-Attacks
- 4. The NIST 800-171 Cybersecurity Standard, Purpose and Requirements**
5. Introduction to Risk Assessments
6. Current Cybersecurity Issues & Solutions
7. Case Studies
8. Working Group Exercise

Who should attend: Cybersecurity is not only a company-wide concern, but also directly impacts your customers and your supply chain. To best understand the breadth and depth of this issue, you are encouraged to send a cross-functional team to this event.
