| Total Amino Acids | 10.0 |

Information concerning the raw materials composing this product can be obtained by writing to NUTECH, 5415 Lake Howell Rd. Suite 177, Winter Park, Florida 32792. Please refer to the lot number found on this container for proper identification. Information received by the Washington State Department of Agriculture regarding the components in this product is available on the internet at <http://agr.wa.gov>.

GENERAL INFORMATION

EXECUTE is an amino-acid based fertilizer that combines premium plant enhancement technologies that maximize efficiency and plant performance. **EXECUTE** is designed to be used with a complete plant nutrition program recommended for use as part of a balanced fertilization program to support optimum plant health, growth and development. For fertilizer rates suitable to your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist/Certified Crop Advisor or contact NUTECH, 5415 Lake Howell Rd. Suite 177, Winter Park, Florida 32792

PRECAUTIONS

Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes. **EXECUTE** is compatible with most insecticides, fungicides, herbicides and acid, neutral, and alkaline fertilizers, so it can be used in combinations in foliar applications or fertigation programs. **EXECUTE** is not phytotoxic at the recommended rates. When using **EXECUTE** with other products, add **EXECUTE** to the tank or water, before mixing in the other products.

CAUTION

Net Contents: ☐275 gal ☐5 gal ☐2.5 gal

DIRECTIONS FOR USE

EXECUTE provides reduced nitrogen in the amino form so it can be used efficiently by plants and used in building their own proteins. In the soil it provides a balance of nitrogen and carbon for microbes and can aid in the uptake of micronutrients from the soil. **EXECUTE** can be used on any crop at various stages of growth. It can be applied directly to the soil, through irrigation or foliar applied, with enough water to obtain good foliar coverage.

CROP RECOMMENDATIONS:

Row Crops:

Foliar application: During plant growth and development, make up to five applications of **EXECUTE** at a rate of 1 pint-2 qt/ac, repeating at critical growth stages as needed.

Soil application: Apply **EXECUTE** directly to the soil alone or with nutrient solutions at 1-2 qt/ac at planting..

Top-dress, with Nitrogen solutions: Apply **EXECUTE** at 1 qt/15 gals of nitrogen solution.

Fertigation: **EXECUTE** can be applied with irrigation water, at a rate of 1-4 qt/ac.

Vegetable crops: Apply **EXECUTE** in the four most critical growth stages of any given crop, such as germination, vegetative growth, flowering, fruit set and fruit development at a rate of 2-4 qt/ac.

Seed treatment and water transplant application: Use ¼ -1 gal/ac of **EXECUTE** with 25 gals of water as seed treatment spray or mist or as part of the transplant water.

NOTICE

The statements made on this label are believed to be true and accurate, but because of conditions of use which are beyond our control, NUTECH does not make, nor does it authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof.
