**Re: REVISED REDUCED BRIDGE LOAD POSTING/WEIGHT LIMIT – Roe Bridge
– Tribrook Rd. over Roeliff Jansen Kill – Tn. Hillsdale**

Date: February 5, 2019

Please be advised that due to a recent inspection by the NYSDOT Reg. 8 Bridge Inspection Unit, the Roe Bridge, carrying Tribrook Road over the Roeliff Jansen Kill located approximately 300' west of the intersection of Tribrook Rd. and Collins Street, **will now need to be posted with a 10-Ton maximum vehicle weight limit.** This further reduction from the current 12-ton bridge load posting is a result of continuing steel stringer section loss and deck deterioration which further reduces the load-carrying capacity of this bridge.

The Columbia County DPW will begin investigations to determine if there are any cost-effective and feasible countermeasures, repairs or enhancements available to us to restore at least some of the load-carrying capacity of this very low-volume, local bridge structure. The new 10-ton weight limit posting will be accomplished by the County DPW within the next several days. We thank you very much for your continuing patience and cooperation with our ongoing Co. DPW bridge maintenance and capital program.
