

Forth's Level-2 Electric Vehicle Charger Giveaway

What is Forth?

Forth is a national nonprofit and trade organization based out of Portland, OR. We advocate for electric, shared, and smart mobility through four primary areas: Industry Development, Consumer Engagement, Demonstration and Pilot Projects, and Policy Advocacy. Check us out online at forthmobility.org!

What is this Project?

Forth received a bunch of level-2 electric vehicle (EV) charging stations and was instructed to give them to organizations that are willing to install them as workplace charging stations by the end of summer 2020. Forth is not authorized to pay for the cost of installation.

Location Requirements:

- Chargers must be installed in Oregon.
- Chargers must be installed before October 2020.
- Chargers installed at locations should be easily described as workplace charging, even if the chargers are placed in locations that have multiple uses, such as public charging outside of work hours or fleet vehicle charging.
- Note that pedestals are not included (Forth can help facilitate the purchase of pedestals if needed).

To apply for these chargers please send the following information to whitakerj@forthmobility.org

1. The specific location of where the chargers will be installed.
2. How many chargers you are looking for.
3. How many people at the location already drive electric vehicles and would likely utilize the chargers regularly.
4. Why your location fits the description of workplace charging.
5. How the chargers will impact the organization and the local community.

Charger specifications

Aeroenvironment-RS units. Details and install guide:

<https://www.evsolutions.com/Upload/Product/636513225838506420.pdf>

The units look like this and have 25 foot long cords: <https://smartchargeamerica.com/electric-car-chargers/home/aerovironment-evse-rs-25/> (specifications included at this site)
