OUR MISSION

We founded Groups: Recover Together to make treatment for opiate use:

RESPECTFUL

Deciding to stop using and change your life is worthy of our respect. Addiction is a disease, not a choice.

ACCESSIBLE

The best evidence-based care should be available where you need it, when you need it.

AFFORDABLE

Ability to pay should never be a barrier to getting treatment. We offer discounted weekly rates starting at \$65 for those without insurance.

“Drugs can steal the things we care about most leaving us alone and uncertain of our future. Get back to the things you love: family, friends, recreation, work, and health”

—DR. JEFF DEFLAVIO, FOUNDER

HOW IT WORKS

MEDICATION WHEN YOU NEED IT

At Groups: Recover Together, buprenorphine (Suboxone) is prescribed in correct doses to curb pain and sickness from withdrawal, setting you up for the best chance at recovery. Medication is tapered safely when you feel ready.

WEEKLY MEETINGS WITH A SUPPORTIVE COMMUNITY

We are community of counselors, physicians, and recovering opiate users who understand your experience and are committed to your success. Weekly meetings provide a safe space to be honest with other people going through the same thing.

HOW TO JOIN

1

CALL OUR SUPPORT CENTER 24/7 AND CHAT WITH AN INTAKE SPECIALIST.

When someone is ready for treatment, we are always available and work hard to get them in right away. We don't believe in wait lists.

2

VISIT YOUR LOCAL OFFICE FOR AN INDIVIDUAL ASSESSMENT

New members meet with a counselor and provider to determine if there is a good fit with our program, and the right dose of buprenorphine to prevent cravings.

3

BEGIN PARTICIPATING IN WEEKLY GROUP

Groups are small (10-15) and with the same people every week. Times are designed to fit into people's schedules so they do not interfere with work or everyday life.
