SOPHOMORES

PreACT

Results from the PreACT, the standardized test which sophomores took in October, were recently distributed in classes. The PreACT is reported on the same 1 to 36 score scale as the ACT and provides students with a score for each of the subject tests (math, science, English and reading) as well as a composite score. Students also received a predicted ACT composite score range which can be used to predict how they are likely to perform when they take the ACT as a junior. According to school data, Ursuline students typically perform at or above their predicted score range. Please ask your daughter to share her results with you. If you have any questions or concerns, please contact your daughter's counselor.
