Pinal County Teachers Examine Math Standards Through Financial Literacy Connections

Several teachers and instructional coaches from districts in Pinal County, recently attended "Making Math Real for Students Through Personal Finance Connections" facilitated by Robin Palmer, Director, Entrepreneurship and Financial Math for the Arizona Council on Economic Education. Students often lack understanding of financial concepts that will impact their lives. The goal of "Money Minutes" is to help students understand personal finance concepts through their grade level standards. "Money Minutes" are free, ready to use questions that are aligned directly to the Arizona Math Standards.

Lucid STEM Careers Teacher Workshop

Middle school teachers at Casa Grande Elementary School District were treated to a day of learning on Friday, February 24th. The outreach group at Lucid is interested in developing Middle School STEM curriculum that can be implemented at local schools, as a way of getting Casa Grande middle school students exposed to careers at Lucid.

Science - Leadership Guidance for Administrators

With the changes in science education, the most common questions asked by administrators and coaches are “What should I be looking for in the science classroom” and “What does three-dimensional science instruction look like”. The good news is that these are easy questions to answer. Join us for all these answers and more.

April 21, 2023, 4:00 pm - 6:00 pm
Location: Zoom

Registration

Implementing Small Group Math Instruction

Small group instruction has been used to support student literacy for many years. In this session you will learn a framework to implement small group math instruction to maximize learning.

May 5, 2023, 8:30 AM - 3:30 PM
