OUR JOURNEY. OUR COMMITMENT.

ActionBuilt LLC started in 2003 as a general contractor specializing in alternative building practices. We built residential homes and light commercial projects using structural steel framing, insulated concrete forms, structural insulated panels, steel sandwich panels and architectural metal roofing and siding.

As our business grew, so did our focus. We became known for our architectural metal work and simplified our business plan to work mainly in that arena.

A TIMELINE OF GROWTH

2003

ActionBuilt LLC is founded as a general contractor specializing in alternative building practices.

2013

We add product manufacturing to our business—enabling us to control quality, reduce material waste and minimize installation time.

TODAY

ActionBuilt and our partners manufacture and provide a large variety of custom architectural metal products with turnkey installation.

QUALITY. EFFICIENCY. VALUE.

In-house manufacturing means better quality control, less waste and faster installation—benefits that we pass on to our customers.

STRONG PARTNERSHIPS. STRONGER RESULTS.

From the beginning, we've worked side by side with our friends at CN Metals in Oakland, MD. Together, we manufacture and offer contractors and homeowners a wide variety of custom architectural metal products and turnkey solutions.

Working together to manufacture and offer custom architectural metal products and turnkey solutions.
