Tutoring Math *Virtually* for My Chesed Project

CHESED
REPORTER
Ethan Silverberg

For my Chesed Project I chose to tutor mathematics *virtually*. I am tutoring students in grades two and six. In this project I can use my knowledge of math to help others. I am applying strategies that I have learned from my teachers to make learning math more fun for the kids I am tutoring. We are working on word problems, fractions, and exponents. One strategy I am using to make learning math more fun is playing games such as Jeopardy, hangman, and 2048. I really enjoy tutoring math and plan to continue for the next few months.

WHAT I LEARNED FROM MY PROJECT

I have learned that you can use your skills to help others. Happiness does not just come from getting things, but by giving to others. I learned that I could use my skills to make a difference in the lives of other people. I feel good seeing the kids I am working with not only learning but having fun.
