THE LANCET Child & Adolescent Health

Delivering transformative action in paediatric pain: a Lancet Child & Adolescent Health Commission

Stakeholder kit

EMBARGOED UNTIL TUESDAY OCTOBER 13, 2330 h BST

Cover image credit: Shaniah Barry/EveryLife Foundation

Introduction & kit contents

The findings of this new <u>Lancet Child & Adolescent Health</u> Commission, the first of its kind ever to address paediatric pain, calls for transformative action around 4 goals. The report was led by the <u>Centre for Pain Research</u> at the University of Bath, supported by <u>Versus Arthritis</u> and <u>The Mayday Fund</u>, and reflects the views and opinions of over 20 multidisciplinary medical professionals worldwide, as well as patient and parent partners, whose experiences fed into the work.

We appreciate your support in sharing the findings of the report. Any questions please e-mail Stephanie Clague (stephanie.clague@lancet.com)

In this kit, you will find...

- Executive Summary & press release
- How to access the Commission
- Linked Content
- Social and multimedia assets
- Social media messaging
- EAPS Conference presentation
- About The Lancet's Future Child Campaign

Executive Summary

Every infant, child, and adolescent will experience pain at times throughout their life. Paediatric pain ranges from acute to chronic, and includes procedural, disease-related, breakthrough, and other types of pain. Despite its ubiquity, pain is often silenced and appropriate relief too infrequently given. Undertreated, unrecognised, or poorly managed pain in young people can have long-lasting negative consequences in later life, including continued chronic pain, disability, and distress. It is time for change.

This Lancet Child & Adolescent Health Commission presents four transformative goals—to make pain matter, understood, visible, and better. It sets out priorities for clinicians, researchers, funders, and policy makers, and calls for cross-sector collaboration to deliver the action needed to improve the lives of children and adolescents with pain.

A press release by University of Bath and Versus Arthritis is available here.

Access the Commission

The Commission and all related content are free to read (with free registration to TheLancet.com):

Social media messaging

Suggested social media messaging for Twitter and Facebook are available here.

Example tweet:

Undertreated, unrecognised or poorly managed pain #pediatricpain leads to long-lasting negative consequences in adulthood. New @LancetChildAdol Commission provides #4goals4pain to improve the lives of children and adolescents with pain and their families https://hubs.li/H0xDmQL0

On Twitter, please use our Commission hashtag **#4goals4pain** Other hashtags: #pediatricpain #paediatricpain

On Twitter please tag @TheLancetChildAdol

On Facebook please tag @TheLancetMedicalJournal

EAPS Conference presentation

The findings of this Commission will be presented at the European Academy for Paediatric Societies 2020 conference in a dedicated session on Fri, Oct 16, 2020 at 7:50pm_8:50pm CEST. Session title: Interdisciplinary Session: Lancet Commission on Paediatric Pain. The session is for conference delegates only.

Please consider promoting this session through your networks and channels By tweeting the below:

Attending #EAPS2020? Don't miss the launch session of a new @LancetChildAdol Commission on #paediatricpain #pediatricpain

Or retweeting this tweet

We encourage you to tweet the findings during the session, and resharing the assets provided here #4goals4pain

The Lancet's Future Child Campaign

This Commission is the next milestone report to publish within The Lancet's 2020 Future Child campaign, which seeks to put children at the heart of our vision for a sustainable humanity.

Every infant, child, and adolescent will experience pain at times throughout their life. Despite its ubiquity, pain is often silenced, unrecognised, or poorly managed, which can have long-lasting negative consequences. This Commission presents four transformative goals—to make pain matter, understood, visible, and better—and sets out priorities for clinicians, researchers, funders, and policy makers to deliver the action needed to improve the lives of children and adolescents with pain.

Whoever you are, wherever you are, you can help us influence progress on child and adolescent health:

- Sign up to receive our campaign updates and stay up to date with our campaign and the latest evidence published in the Lancet family of journals
- <u>Follow us @TheLancet</u>, share our campaign <u>calls to action</u>, and join in the conversation using #FutureChild
- Use our <u>campaign milestone resources</u> to help you spread the word
