

Reimbursement for G2211

Effective with dates of services on or after July 1, 2026, HCPCS code G2211 is only payable for HAP Medicare Advantage members when the service meets the billing guidelines and is supported in patient medical records.

For HAP Commercial and ASO self-funded members, G2211 is considered included in the reimbursement for outpatient evaluation and management services and therefore is not separately payable.

Reminder – G2211 code description: Visit complexity inherent to evaluation and management associated with medical care services that serve as the continuing focal point for all needed health care services and/or with medical care services that are part of ongoing care related to a patient's single, serious condition or a complex condition. (Add-on code, list separately in addition to office/outpatient evaluation and management visit, new or established).
