

HAP website redesign launches this week!

We're excited to share that the newly redesigned **hap.org** will go live on Jan. 29. The update is based on extensive user feedback and designed to better support you by making it easier to find the tools, resources and information you need. With improved navigation and a more intuitive layout, our new site will help simplify everyday tasks and time spent searching for answers so you can stay focused on delivering high-quality care to patients.
