

Removing Clear Claim Connection from Provider Portal

Effective December 5, 2025, Clear Claim Connection, the tool for validating code editing denials, will be removed from our secure provider portal. This decision was made to ensure alignment with proper billing practices and streamline our resources.

While the tool will no longer be accessible, providers can continue to validate code editing denials using other reliable references, including:

- Official coding guidelines (e.g., CMS, AMA CPT)
- Payer-specific billing policies
- Industry-standard coding resources
