

## **Update - Henry Ford Infusion – Preferred Provider for Home Infusion of Specialty Medications for HAP Commercial Members**

Effective August 1, 2025, HAP Commercial members residing in Macomb, Oakland and Wayne counties, must receive specialty medications professionally administered at home from our preferred specialty provider – Henry Ford Home Infusion. **Henry Ford Home Infusion will provide the specialty medication as well as nursing services.** We will contact members affected by this change.

These medications are marked with SPC in the *Key* column on our *Services that Require Prior Authorization List*. When submitting a request via our online authorization application for any HCPCS codes that are designated with SPC, you will be alerted that the medication must be provided by our preferred specialty provider.

If you are providing specialty medication home infusion services to members outside of Macomb, Oakland, and Wayne counties, please complete your request electronically via our online authorizations tool, CareAffiliate, or complete our [HAP Infused Medication Form](#).

This change does not affect services administered in the clinic or infusion center. We will update our *Home Infusion Policy*. You can find the policy when you log in at **hap.org** and select *Benefit Admin Manual* under *More*.
