

New Enrollment Platform Go Live

Last month, we told you about the implementation of our new platform, eApply, for enrolling with Health Alliance Plan by Henry Ford Health and HAP CareSource.

We're excited to announce, go live for eApply is June 16, 2026! On that date, our [website](#) will be updated with all the information you need. **Be sure to refer to the help guides as they include important information about registration.**

Reminders

- Providers affiliated with a provider hospital organization (PHO)/provider organization (PO) will continue to work directly with their organization for enrollments.
- POs/PHOs currently submitting rosters to us will not use eApply and should continue to follow the roster process
- There are three application types:

Application	Definition
Individual Practitioner (Type 1 NPI)	A licensed individual who provides medical or clinical care (e.g., physician, nurse practitioner, therapist, or other healthcare professional). They can be credentialed or not credentialed. Important! Practitioners must be associated with a Health Alliance Plan participating group type 2 NPI to proceed with enrollment.
Group (Type 2 NPI)	Provider entity that is not credentialed separately; however, its related practitioners may require credentialing.
Facility (Type 2 NPI)	Organization/entity that requires credentialing.

On June 16, when you visit our [website](#), just refer to the appropriate section based on the definition above and follow the instructions! We will contact you after the enrollment process is complete.

We are confident eApply will improve our provider onboarding process!
